

Qpath for Attendings

Hi all,

We wanted to send out a few tips for using Qpath as a supervisor of residents scans, and for your own scans that you perform.

1. Accessing Qpath
 - a. Either log in through web apps
OR
 - b. log in ANYWHERE DIRECTLY via
<https://carolinashhealthcare.qpath.cloud>
2. Notifications- what they mean
 - a. Under "Name" column will say:
 - i. **Exam for review**- this is a study a resident submitted for QA with you listed as the attending. Once you look at images it will come off your list. No need to sign anything
 - ii. **Exam review complete**-this is a study YOU as the operator submitted for QA that has been reviewed by US faculty. (will not get this for every study, usually only if feedback given)
3. How to tell if your resident's studies are not getting signed/submitted for QA
 - a. We hope to push this tab out to attendings at some point, but currently cannot do without reconfiguring everyones Qpath dashboard. So in order to create this tab yourself do the following:
 - i. Click "All Exams" Tab on home board
 - ii. Go to the "Attending" column, and click on 3 dots at right of column header. Drop down menu will appear
 - iii. Click "filter" and click on second box from top that says "select user or team" and click "me" (should be first option)
 - iv. Select blue "filter" button at bottom of drop down
 - v. Now go to QA status column header and click on 3 dots at right of column header. Drop down menu will appear
 - vi. Click "filter" and click on second box from top that says "select value" and click "Not Submitted"
 - vii. Select blue "filter" button at bottom of drop down
 - viii. Once this is done, go to the TOP RIGHT of the screen and click on the pushpin image. This will allow you to name the new tile (suggest Attending Not Submitted) in the "Tile Name" blank.
 - ix. Select Blue OK button at bottom of this box and you now should have the tile on your home dashboard of all the studies with you as an attending that have not been signed/submitted for QA. This list will automatically populate with new studies and remove studies that are submitted.

****If you need help creating this tile, please see any of the US Faculty****
